Highly motivated and hardworking university student with nearly a year of practical experience in Web Development creating client websites. I have great communication skills developed during group projects at university and work with a strong desire to learn. My strengths include excellent knowledge of HTML, CSS, JavaScript, SQL and PHP as well as their frameworks such as Bootstrap, jQuery and Laravel. Aspire to become a full time Web Developer after completing my studies. Looking to expand my current knowledge in front-end as well as back-end code.

Skills

- Excellent HTML, CSS, JavaScript, SQL and PHP skills.
- Competence in most commonly used frameworks and libraries such as jQuery and Laravel.
- Great communication within a team developed during various group projects.
- I am a hardworking, punctual and great at problem solving.

Education

2014 - present
- **Staffordshire University**
  BSc (Hons) in Web Development
  - Web Concepts – 78.02%
    Created my portfolio website following the current industry standards.
  - Introduction to Programming – 75.35%
    Created various programs including Windows App written in OOP (Object Orientated) C#.
  - Skills for Computing Professionals – 74%
    Responsible for creating majority of PHP back-end code for group-based project.
  - Programming with HTML APIs– currently studying
    Expanding my knowledge on JavaScript and AJAX while using various APIs
  - Server Side Scripting – currently studying
    Expanding my knowledge on OOP (Object Orientated) PHP by creating applications following industry tools like Agile, Scrum and Kanban

2012 – 2014
- **Stapenhill Post 16 Centre**
  2 A Levels passed including ICT and Maths.

  In addition, I have achieved:

  - Part of Young Enterprise.
    I was responsible for creating and managing business website.

2009 - 2012
- **Blessed Robert Sutton Catholic Sport College**
  8 GSCE passed including:
  - *ICT gr*ade A
  - Maths grade B

Work Experience

2015 - present • **Self Employed**
Part time – Web Developer
Having setup my own business has allowed me to develop my ability to work to deadlines for clients as well as expand my knowledge in front-end and back-end development while using good coding practises.

2015 (Jul - Sep) • **PointBold**
Part time - Web Developer
Worked as part of a small team creating web applications using languages such as PHP and JavaScript as well as various frameworks like Laravel and jQuery.

2015 (May - Sep) • **Goult Creative**
Part time – Web Developer
Coded client websites using design templates created in Photoshop. Improved my front end development skills in HTML, CSS and JavaScript. Was responsible for integrating CMS systems such as SilverStripe and Perch.

2015 (Apr - Jul) • **Autumn.Dev**
Part time – Web Developer
Maintained a website for a local client where I used frameworks such as Laravel and Symfony, also database systems running MySQL and T-SQL.

2010 (Nov) • **Waterstone's Book Hub**
Part time – Systems Officer
Worked alongside skilled computer specialists. Setting up computers, printers, faxes and servers as well as resolving problems that arose and fixing all sorts of devices.

Other Competencies & Interests

Languages   Polish: Excellent conversational and written Polish

Coding   One of my biggest interests is coding. I often find small projects to work on in my free time to pursuit my hobby as well as expand my knowledge while following latest technology news.
